

MCS-33T COLLECTION TRUCK

The MCS-33T: The Fusion of
Productivity and Convenience

After years in the research and development phase, Shred-Tech's MCS-33T emerges as the industry's most efficient collection truck. Loaded with features, it boasts 14,000 lbs of payload capacity, and holds twice the paper as a 24' straight truck. The MCS-33T is the perfect addition to your shredding operation.

LOADING

The patent pending Gripper Tipper® is capable of handling all bin types including 64, 96 and 175-gallon containers with a "One Step" operation. Multiple tipping locations allow for tipping up to 3 bins in 15 seconds. The expandable and lockable bin tipper enclosures provide a sealed compartment which ensures material is protected from environmental elements while maximizing security and operator safety.

CONTROLS

The LCD monitor, conveniently located on the control panel, allows for constant payload monitoring. Bins are loaded at curb-level utilizing convenient yet rugged hydraulic control levers.

AUTO UNLOADING

The MCS-33T features an active floor for quick and easy unloading. When maximum capacity is reached, the operator simply activates the active floor and in minutes is back on route. Less time unloading equates to more time generating revenue.

COLLECTION TRUCK

The MCS-33T: The Fusion of Productivity and Convenience

MCS TECHNICAL SPECIFICATIONS	MCS-33T
International 4300 Series	S
ENGINEERING	
System Controls	Ground / Curb Level
Cycle Time: Load (per lift) / Unload (full load)	< 15 s / < 5 min
Legal Payload Capacity*	14,000 lbs
Loading Method	Single Tipper at Rear 64/96 Double Tipper at Front 64/96/174
Unloading Method	Active Floor
Drive Configuration	PTO / Hydraulic
Chassis Type	Single Axle
Chassis GVW	33,000 lbs
Chassis Horsepower	225 hp
Body Construction	Unibody FRP
SYSTEM DIMENSIONS	
Overall Length	32'
Body Length	22' 5"
Width	8' 5"
Height	13'
Weight Empty	19,000 lbs
